ROCKNOLL NURSERIES, MORROW, OHIO

HARDY PERENNIAL FLOWERS

PERENNIAL CORNFLOWERS CENTAUREA

Much neglected perennials that flower practically all summer through. They are very tough and hardy; excellent for cutting.

47c Each 3 for \$1.15 \$4.00 doz.

MONTANA—Deep blue flowers 2½ in. across on 15 in. stems.

MACROCEPHALA—Tall stiff 3 ft. stems with large showy golden yellow flowers.

ROSE BEAUTY—(Popyleuca) New deep rose from the highest mountains of Persia.

6 Perennial Cornflowers \$2.00

2 each Blue, Yellow, and Pink.

Rocknoll is located 22 miles north of the Ohio River in Southwestern Ohio. We have severe cold winters often without a protecting snow blanket and hot dry summers. Temperatures range from 20 degrees below zero F. in winter to 100 degrees in the shade in summer. We have periods of heavy rainfall and periods of drought just the same as you do.

Our soil while very fertile and productive is only good farm land used for growing corn before we took it over. We do not have deep black celery soil or sandy old lake bottoms to force fast growth on plants that often fail to hold up when moved to your garden soils.

We wish to thank our many customers for their great interest in our hardy perennial department. The plants we will send you are all well started transplanted two and three year old plants. The plants listed are especially recommended to plant in the fall with success.

Except Novelties

Late Summer and Fall is an ideal time to plant Hardy Chrysanthemums. After several years of trial, we have decided that the most satisfactory plant to use at this time is a well-grown potted plant. These will be available late Summer and Fall and will be sent to you in bud or in bloom as the season progresses.

Ready for shipping—late August and early September. Our Mums are listed to color and their types designated in the description of each plant. The types are further described as follows:

1. GIANT FLOWERED—4 to 7 inches across. Dutch and English.
2. POMPONS—Flowers 2 to 4 inches across. Tall stems.
3. CUSHIONS—Plants up to 18 inches high.

GLORIOUS ORIENTAL POPPIES

**LARGE 2 YEARS OLD FIELD GROWN
PLANTS THAT BLOOMED WELL IN
JUNE**

Oriental Poppies are very easy to grow, provided you remember one or two peculiarities. Natives of a semi-arid part of the world, they will not tolerate wet feet or shade. They bloom in June and July, then go into a dormant period losing their foliage entirely during most of August and September.

While they are dormant and through October is the best time to transplant large field grown Poppies.

HEMEROCALLIS—DAY LILIES

EVERY YEAR Hemerocallis or Day Lillies are becoming deservedly more popular as they grow successfully anywhere in the United States. This is the plant that blooms in Mid-Summer. They bloom from May through August but their main show is in July, when there is not much else in bloom. Their warm colors blend in perfectly with the hot July sun. Grow well in Sun or Half-Shade. We ship large flowering roots, from August to November.
